

Louisiana Solar Energy Laboratory

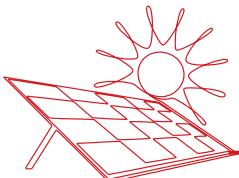

Summer Research Internship

UNIVERSITY *of*
LOUISIANA
L A F A Y E T T E [®]

Training in Research Methods and
Modern Laboratory Equipment through
**Floating Solar Plant Design
and Technology Analysis**

Presented by:
Jui Roy

Supervised by:
Terrence L. Chambers, Ph.D., P.E.
Donald & Janice Mosing BORSF Endowed
Chair in Mechanical Engineering
Director, EDA Green Hydrogen Center of Excellence
University of Louisiana at Lafayette

Objectives

of the Internship

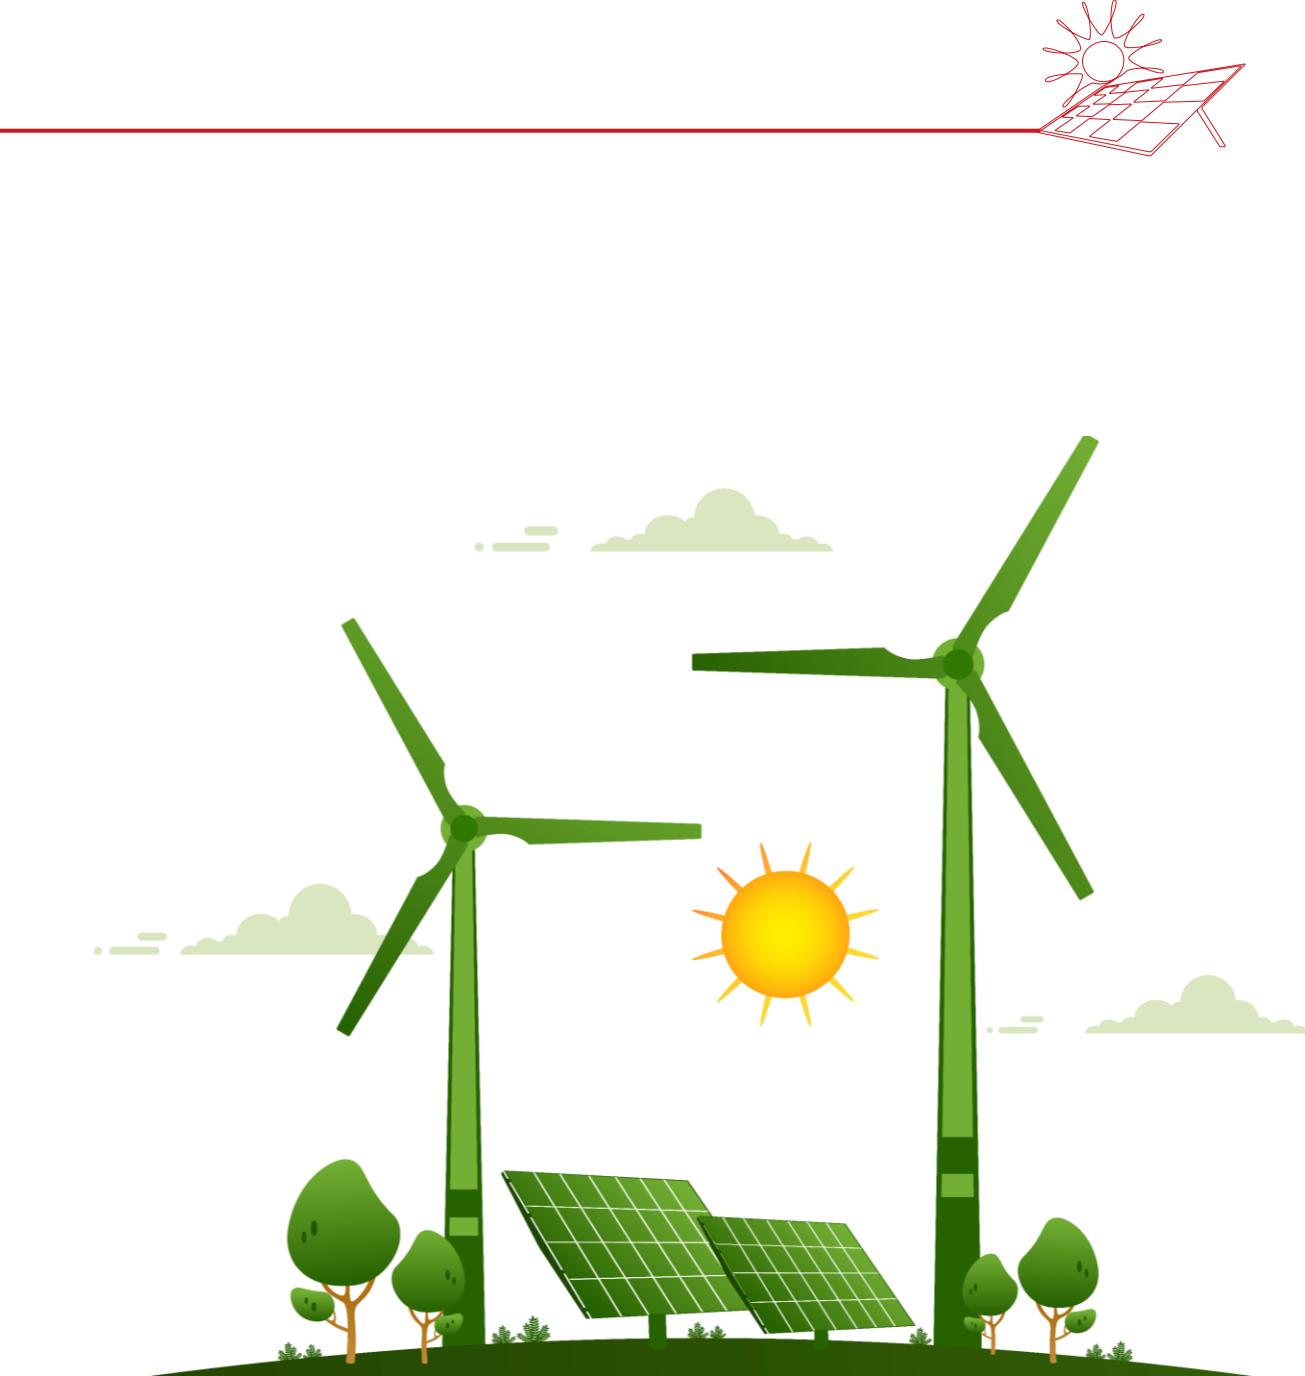

- Get hands-on experience with software tools for simulation and design
- Using laboratory equipment
- Analyzing Floating Solar Plant Designs and Technologies

Purpose

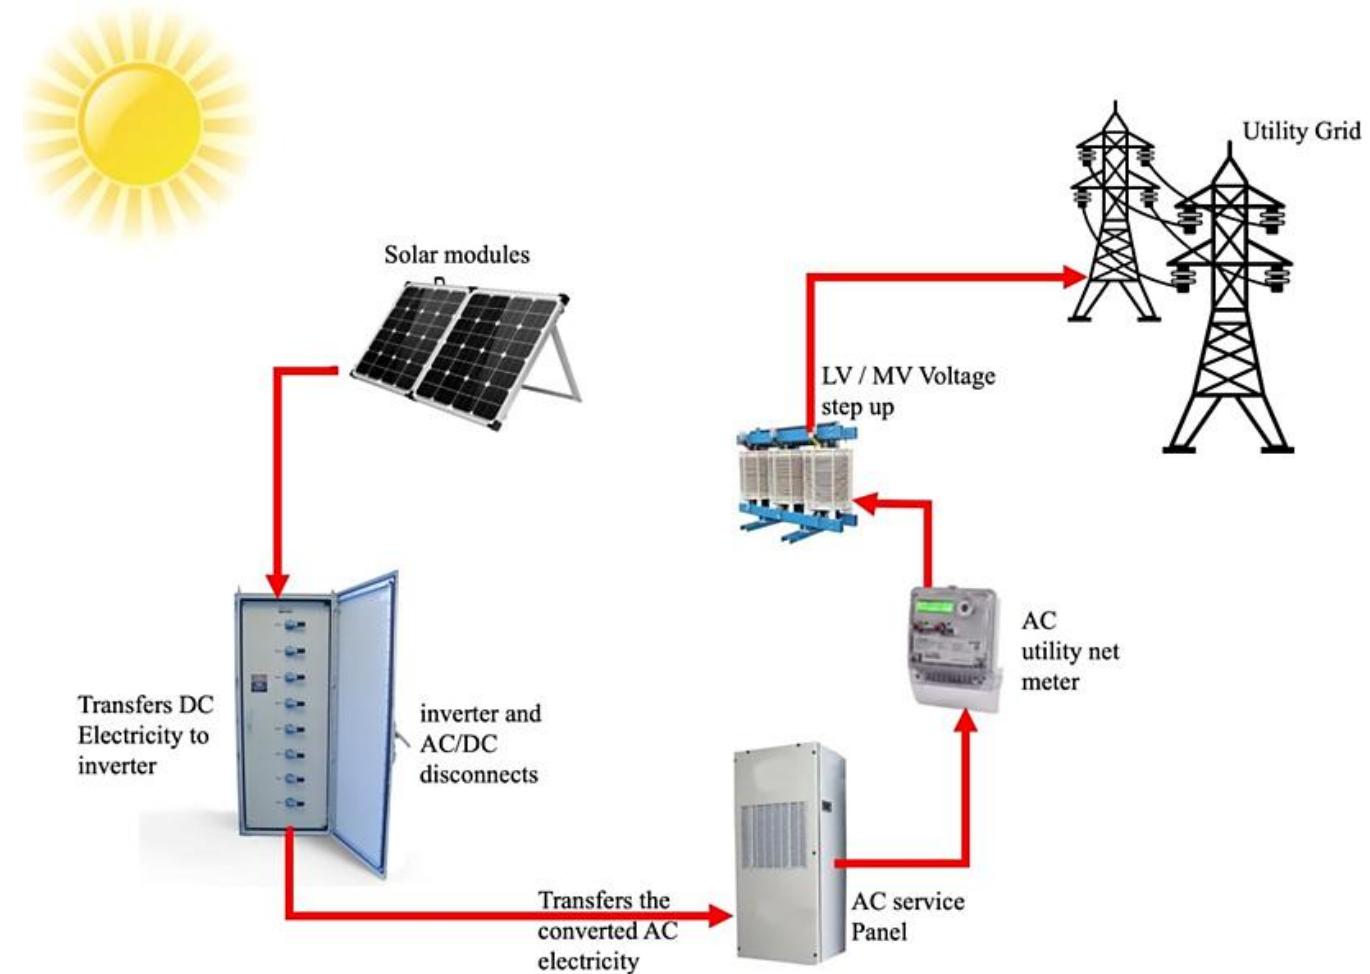

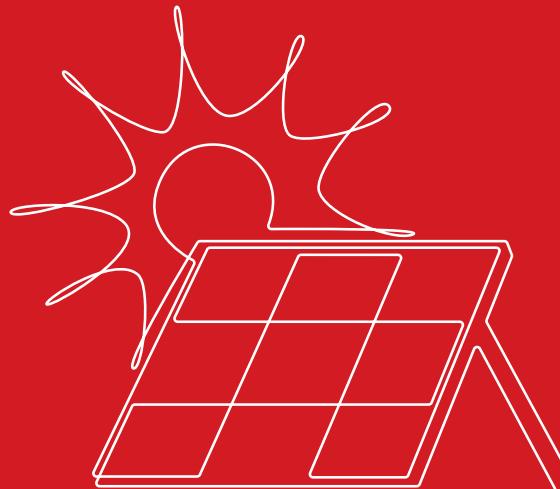

- Master Fundamentals of Solar Power Plants
- Learn and Apply Design Software
- Energy Analysis of Floating Solar

Renewable Energy

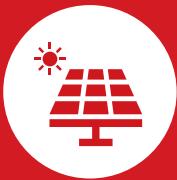

- Definition
- Type
 - Solar
 - Wind
 - Hydropower
 - Geothermal
 - Biomass

Solar PV and Solar Power Plant

Type of Solar Energy System

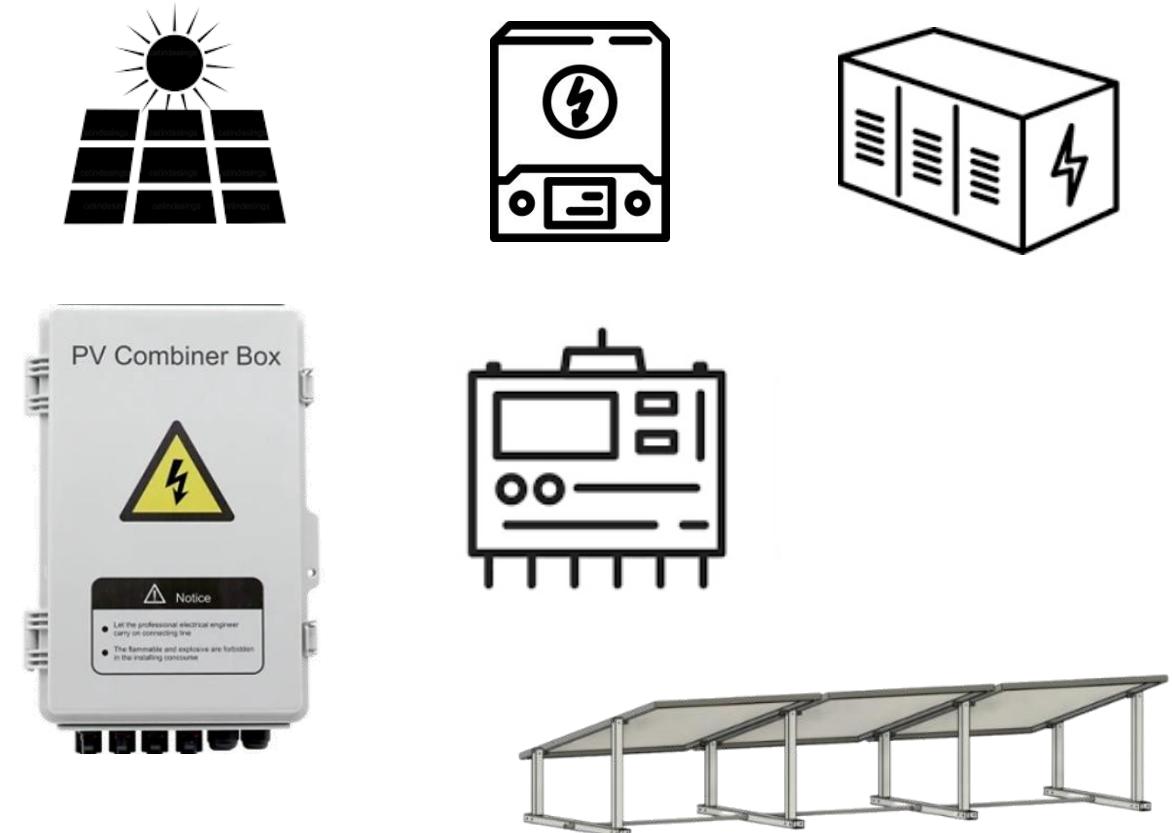

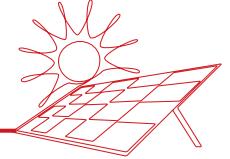

Residential Solar

Commercial Solar

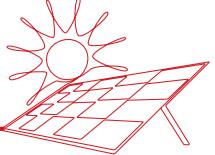

Utility Solar

Component of a PV plant

Solar Safety

- ✿ Installation Safety
- ✿ Site and mechanical Hazards
- ✿ Electrical Hazards

WEAR HEAD PROTECTION

WEAR FACE MASK

WEAR HAND PROTECTION

WEAR EYE PROTECTION

HIGH VISIBILITY CLOTHING

WEAR SAFETY BOOTS

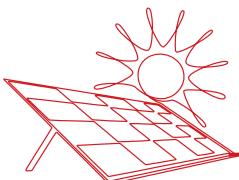

Floating Solar

Overview:

- ✿ Definition
- ✿ Efficiency Boost

Key Design Elements:

- ✿ Floating Structures
- ✿ Anchoring
- ✿ Durability

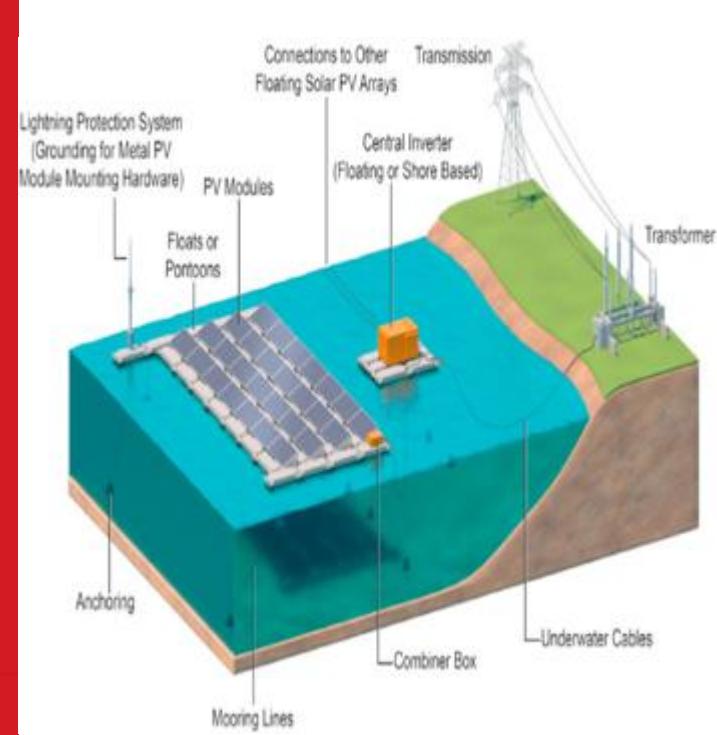

Benefits:

- ✿ Land Savings
- ✿ Water Conservation
- ✿ Energy Efficiency

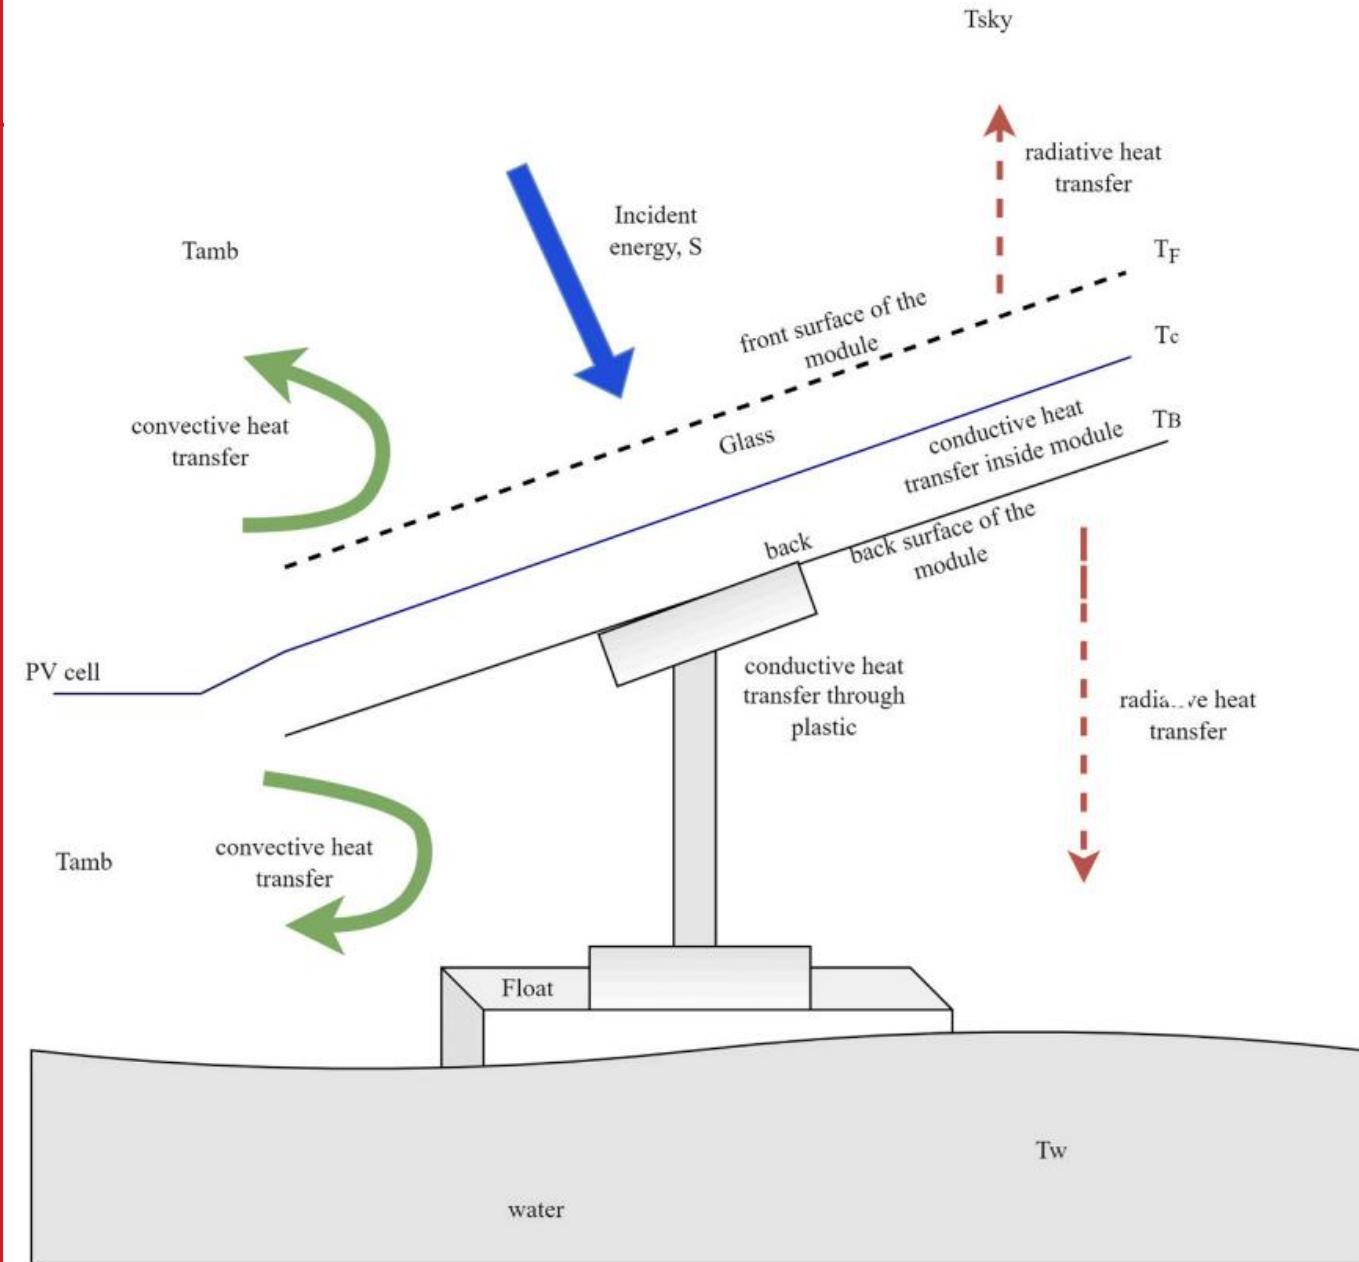

Challenges:

- ✿ Maintenance Costs
- ✿ Environmental Impact

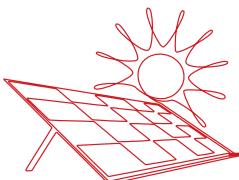

Heat Transfer in FPV

- * Cooling Effect of Water:
Convection and Evaporation
- * Conduction:
Heat Transfer from Panels to Water
- * Radiation:
Heat Release from Panels

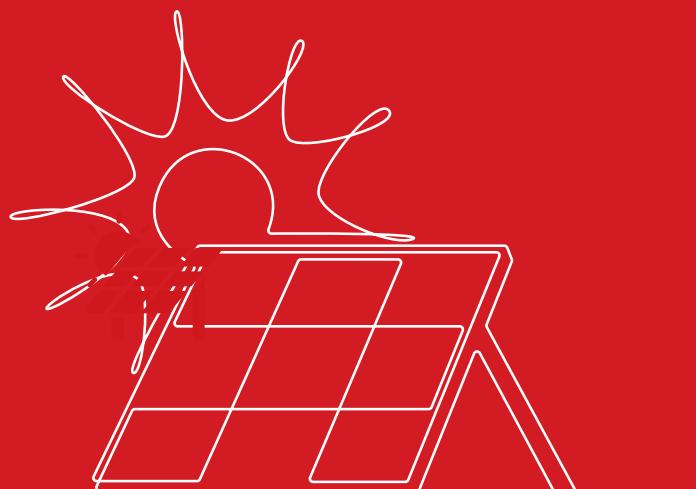

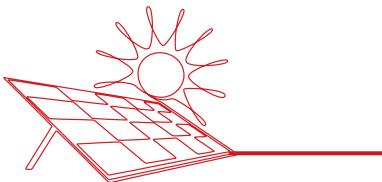

1 MW Ground Solar and Floating Solar

Parameter for design	GPV 1 MW	FPV 1 MW
Tilt angle	25	15
Ground coverage ratio	0.55	0.7
soiling loss	5%	1%
soiling loss	5%	1%
Heat transfer coefficients	a= -3.62 b= -0.075	a= -3.483 b= -0.105
Capital cost \$/kW	1912	2380
Fixed operating cost	18	15.5
Analysis period	30	30
Inflation rate	2.50%	2.50%
Internal rate of return	5.10%	5.10%
Project Internal debt	71.80%	71.80%
Nominal debt interest rate	5%	5%
Effective tax rate	25.74%	25.74%

Registration About Quit

Welcome

We are pleased to announce the 2024 SAM webinar series! Each webinar is a free, live web session with a short presentation of a new feature followed by a Q&A session. Please see the [Events page](#) on the SAM website for details and registration links. See the "Videos" pages on the SAM website for links to recordings of past webinars.

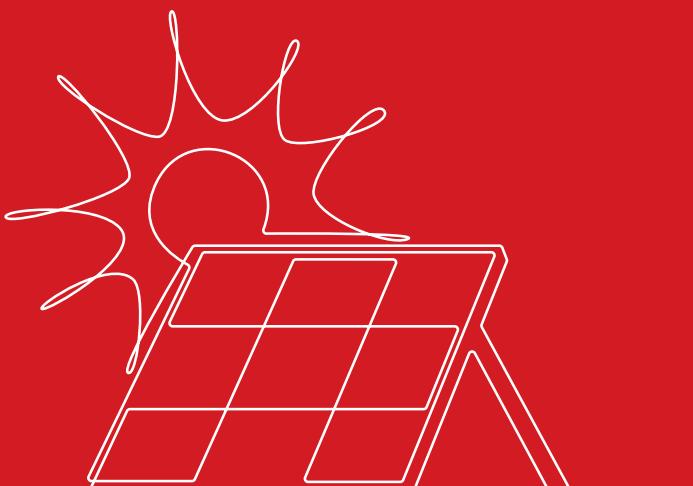

If you are new to SAM and looking for training, the [Training and Curricula](#) page on the SAM website lists online courses offered by the RMI Energy Transition Academy and the Midwest Renewable Energy Association.

Do you have a question or feedback about SAM? Would you like to meet the SAM team? Join us for a [SAM Round Table!](#) Registration is free. These 30-minute online sessions are held once a month. All you need to participate is a computer with an internet connection.

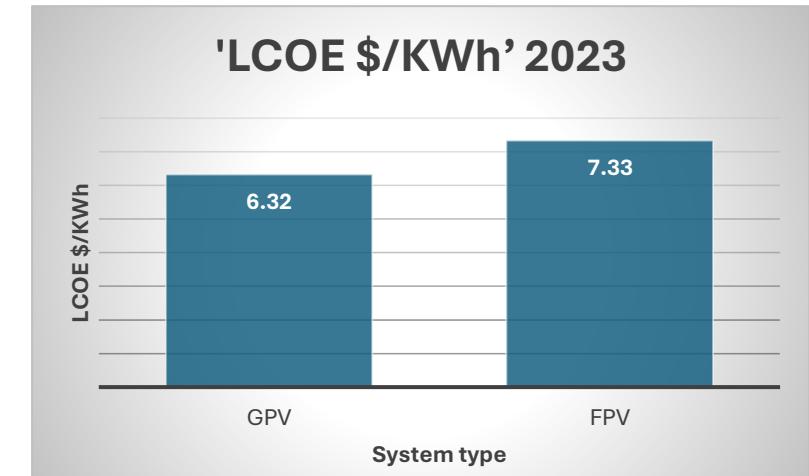

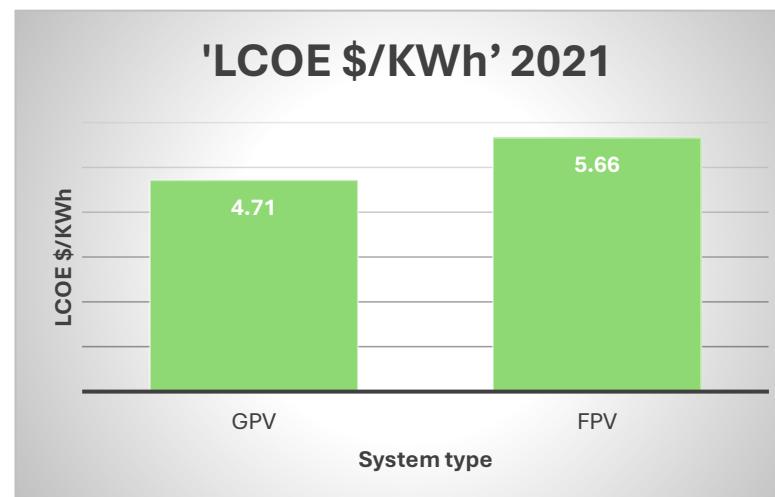

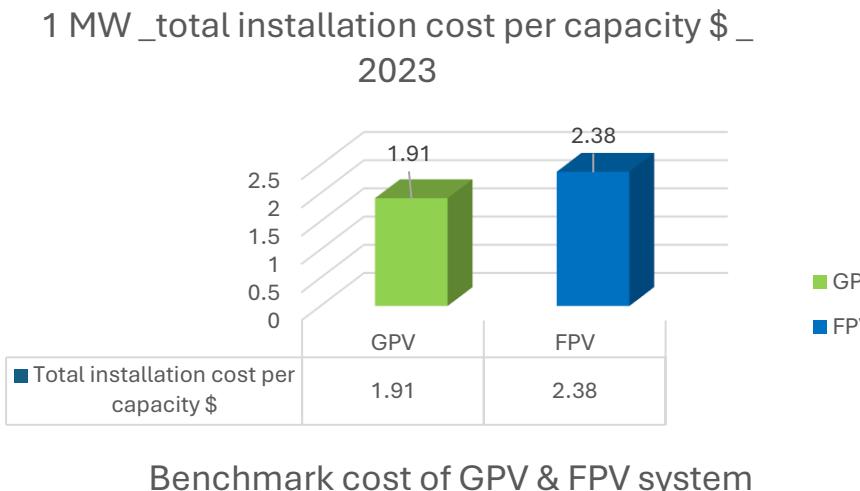

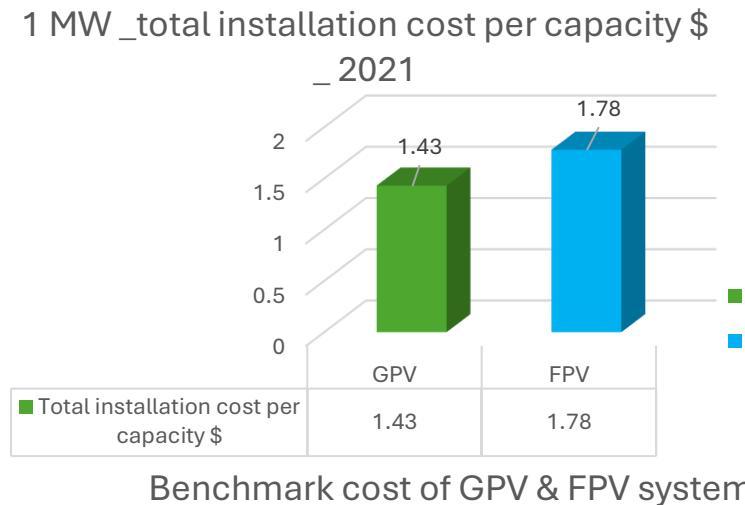

You are using SAM 2023.12.17 r1. The latest version is SAM 2023.12.17 r1 (SSC 290).
To see complete version information for your SAM installation, click **About** in the lower left corner of this window.

Result Analysis

Energy & Economic

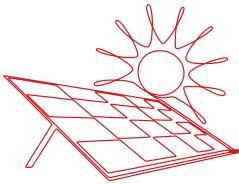

Result Analysis

Environmental

- Water Conservation
- Improved Water Quality
- Land Preservation
- Reduced Heat Island Effect
- Biodiversity Protection:
- Sustainable Development
- Potential for Synergy

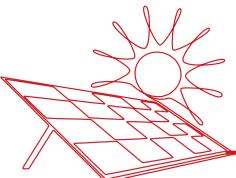

Limitations of the analysis

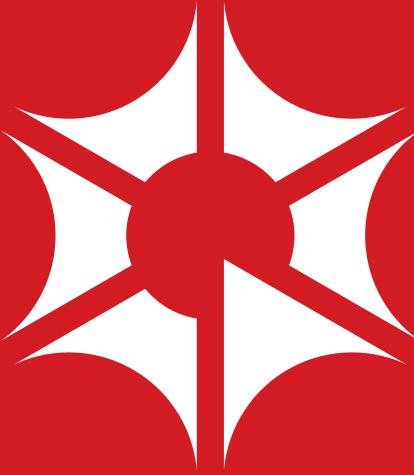

- * No specific software yet to design Floating PV
- * The rule of lease varies in different place

Conclusion

- Higher Efficiency & Carbon Savings
- Water Conservation & Quality Improvement
- Land Preservation & Dual-Use Opportunities
- Environmental Protection & Sustainability

Thank You
